

Private Wireless Networks

Extenet's private wireless networks leverage carrier-hardened 4G and 5G mobile network technologies and CBRS to enable your enterprise to take advantage of a private wireless network without the need to license costly spectrum or settle for a public network.

Digital Transformation

Today's 21st century enterprises demand a wireless network that can deliver the performance, security and mobility required to unlock applications simply not possible using legacy WiFi networks. Extenet's private wireless networks enables businesses, enterprises, and building owners the ability to control their wireless destiny by leveraging carrier-hardened 4G/5G mobile network technologies and the Citizens Broadband Radio Service (CBRS), operating in the 3.5GHz spectrum.

No matter the industry, Extenet can design, build, own, operate, monitor, and maintain a performance optimized private wireless network to support your mission critical applications and enterprise objectives.

Benefits

- Secure Connectivity via SIM-based authentication
- Improved Performance, Low Latency & Quality of Service native to 4G/5G
- Mobility & IoT Connectivity via standards-based LTE & 5G compliant networks
- Efficiencies, Productivity & Savings from a secured, high-performance network

Extenet's private wireless networks deliver the coverage, capacity, and control that is simply not available on public networks.

Service Offering & Commitment

Integral to Extenet's private wireless network is our network-as-a-service (NaaS) solution. Our focus is on the design, build, and operation of your private network, a network that delivers the reliability needed to support your business. We are focused on operating wireless networks and are experts in reliable network connectivity. Enjoy the service without having to worry about the complexity of operating the network or providing the upfront capital to build the network. Extenet invites our enterprise and venue/building owner partners to leverage our wireless network expertise and access to capital to enable your private networks. Our customers benefit immensely from our technical expertise, capital access and long-term partnership assurance.

Let us help plan, transform, and optimize your private networks! From SIM activation to quality of service (QoS) assistance, Extenet is here to help. Get the benefits of a carrier-grade network, including coverage and capacity, all over an enhanced network infrastructure for sensitive data and mission critical operations. As network infrastructure providers, Extenet will invest our capital and technical resources in your private wireless network while guaranteeing our customers high service assurance and network availability for the future.

Carrier-Grade, Enterprise Ready Networks for:

Enterprises

- Reliable & Secure Mobile Connectivity
- Network Control & Data Analytics
- Operational Efficiencies & Performance

Cloud Providers

- Access to Building, Campus or Enterprise via Co-Location
- Edge Computing Application Delivery

Network Operators

- Access to Building, Campus or Enterprise via a Multi-Operator Core Network (MOCN) Architecture
- Increased Coverage for Subscribers
- Improved Customer Retention

Building Owners

- Building Automation & Remote Management of Building Services
- Network Control & Data Analytics
- Next Generation 5G IoT Applications

Manufacturing

Port

Warehousing

Healthcare

Commercial
Real Estate

Sports &
Entertainment

Extenet serves the mobile and fiber connectivity needs of our customers including enterprises, building owners, mobile network operators and cloud providers. With over two decades of experience, our core business includes the design, build and operations of public and private networks.

Why Extenet?

- People, products, processes and platforms, all focused on the needs of our customers
- Long-term partner and technology advisor approach
- Our Ability to deploy capital
- Experience via 600+ networks including public and private networks in 300+ marquis venues
- Network operations capability and strategic partnerships to provide you a holistic solution
