New York Metro Fiber Network

Enabling Data Center & Cloud Connectivity

Benefits

- Trusted data center and cloud solutions provider for enterprises and carriers

- 10gb-400gb connections available

- Diverse, secure fiber paths focusing on minimizing downtime

- Purpose-built, high-capacity fiber network ensures seamless and scalable interconnectivity between NYC metro data center locations, carriers, and regional exchanges

- Remote network monitoring via our 24x7 network operations center (NOC)

New York Metro Data Centers

Data centers are reaping the benefits of the mass migration of applications hosted in the cloud. An estimated 75% of enterprise applications already are! Some top drivers of data center demand include remote work, digitization, digital technologies, and Internet-of-Things (IoT). This has led to a massive uptick in bandwidth demand, and Extenet has the digital infrastructure to accommodate and scale with even the most aggressive data and cloud consumption strategies.

The Extenet Solution

Extenet has a rapidly expanding New York City Metro fiber footprint. Commercial real estate owners, enterprises, data centers, carriers, and cloud providers leverage this unique platform. Extenet provides secure, high-bandwidth interconnections between the most sought-after data center locations in the New York City Metro market, focusing on low latency.

Data centers are at the heart of digital infrastructure and content delivery. As a result, secure, high-bandwidth access to a diverse array of cloud providers is more important than ever. Extenet ensures that our connections are scalable and seamless.
