TARIFF FORMAT

This tariff is divided into the following major sections:

- Section 1: Definitions
- Section 2: Rules and Regulations
- Section 3: Rate Schedules

- A. **Page Numbering:** Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would 14.1.
- B. **Page Revision Numbers:** Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Michigan Public Service Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of various suspension periods, deferrals, etc., the Michigan Public Service Commission follows in its tariff approval process, the most current page number on file with the Michigan Public Service Commission is not always the tariff page in effect. Consult the Check Page for the page currently in effect.
- C. **Paragraph Numbering Sequence:** There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2
 - 2.1
 - 2.1.1
 - 2.1.1.1
 - 2.1.1.1.1
 - 2.1.1.1.1.1
 - 2.1.1.1.1.1.1
- D. **Check Pages:** When a tariff filing is made with the Michigan Public Service Commission, an updated check page accompanies the tariff filing. The check page lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check page is changed to reflect the revision.

The Head End contains Customers’ circuit terminating equipment, Base Transceiver Station and related peripheral equipment, as well as Customer’s RF/Optical conversion equipment. The RF/Optical conversion equipment converts Customers’ RF signals into optical or other signals, and places those signals into a PVC that traverses Company network facilities between the Head End and one or more Points of Presence (“POPs”).

3.1.2 Monthly Recurring Rate Elements

The following monthly recurring rate elements apply to Dedicated Point-To-Point PVC Transport Service:

3.1.2.1 Committed Information Rate

The Committed Information Rate (“CIR”) of a PVC is the amount of bandwidth selected by Customer to carry the traffic that is transported over the Company network and made available in Tiers (increments) of per PVC

3.1.2.2 PVC Rate Elements

PVC Rate Elements relate to both the physical layer and the bandwidth required to create a PVC to transport Customer’s CIR from the Head End to one or more POPs on the Company network. The rate elements that will apply depend on the type of optical conversion and multiplexing methodology used to aggregate one or more Customer CIR Tiers over a PVC to one or more POPs.

3.1.2.5 SONET Ring Charge

The SONET Ring Charge applies to a PVC deployed on a SONET ring network configuration, using Dedicated Strand(s) or WDM, engineered in a point to multi-point configuration. SONET Ring PVCs may be provisioned using customary add/drop, physical interconnect or WDM technology for both originating and terminating traffic, from a head end to one or more POPs connected to the SONET Ring.

3.1.2.6 Add/Drop Charges

Add/Drop charges apply to each POP requested by Customer on a SONET Ring or point to multi-point PVC.
